

[Comusav's English press conference: Covid is defeated \(lbry.tv\)](https://lbry.tv)

Presentations:

- **Pedro Chavez MD** – The solution to COVID-19 (4 min 43 sec)  
Evidence from case studies
- **Martin Ramirez**, PhD Physics and Microbiology (28 mins) on ClO<sub>2</sub>
- **Dr Manuel Aparicio** (42 mins) CDS – the antidote to COVID-19  
Chart showing the therapeutic doses with no adverse effects and harmful doses.  
Scientific medical evidence from case studies
- **Dr Eduardo Insignares** (1 hr) Covid-19: Scientific research with CDS
- **Dr Antonio Ani Vilchez** (1hr 32 min) Human Rights of Patients :A Medical Legal Perspective  
Universal Declaration of Human Rights, The Helsinki Declaration, the right to refuse treatments, 2005 UNESCO declaration on Bioethics and Human Rights etc.
- **Dr Patricia Callisperis** (1 hr 48 min) Experience in the treatment of COVID-19 with ClO<sub>2</sub> in Bolivia (where this is legal after non-toxicity review).  
Infections continued to rise but people survived.  
Universities starting research.
- **Q & A** (2 hrs).  
No need to sterilise ClO<sub>2</sub> but the preparation must be pure.  
Unopened ClO<sub>2</sub> will last for 6 or more months.  
Can be taken during pregnancy and breast feeding.  
CDS can be used with chemotherapy but avoid flour, dairy products, sugar and citrus to reduce acidity of the body.  
Dosage must be moderated for patients with kidney failure.  
C-Protocol for Long COVID for 28 days with recommended supplements.  
CDS increases blood pressure and then lowers it – so need to monitor and adjust dose for those with high/low BP.  
Lower the dose if there are Herx reactions and drink a lot of water.  
Protocols and procedures for helping children with autism.  
CDS lasts in the body for 60 to 90 mins. To avoid interactions allow:
  - ✓ Half hour before/after meals for coffee and tea
  - ✓ One hour before/after for meals and medicines
  - ✓ 2 hours before/after anti-oxidants like Vitamin C because they cancel each other.Mental illnesses seem to be related to leaky-gut syndrome associated with Candida, viruses etc. Gluten is the main problem because the body starts to produce antibodies. CDS helps.  
CDS is very effective against vaginal thrush and Candida Albicans. Watch the diet.  
Protocols for family if someone is infected.  
No scientific evidence of CDS for metastatic liver cancer but Chavez is treating all sorts of metastatic cancers, which are linked to Candida Albicans, which is eliminated successfully by CDS.  
HIV – data shows that virus can be eliminated with CDS in 3 months using the correct protocols.  
CDS can be taken by those with no spleen.  
CDS can be used with some anticoagulants but avoid warfarin and another.  
CDS is not stable if the concentration is higher than 3000 ppm – it will evaporate.  
CDS does not irritate the colon – but food items can. Those with IBS should use herbs to eliminate fungi and parasites.  
CDS does not give immunity but prepares body to overcome the virus – the immunity does not last for more than about 8 months.  
Solubility of ClO<sub>2</sub> decreases with higher temperature and altitude.  
CDS is very sensitive to light. It also evaporates if temperature exceeds 11°C.
